## Setting up permissions for Mailbox Restore

MS Exchange 2007 or more recent

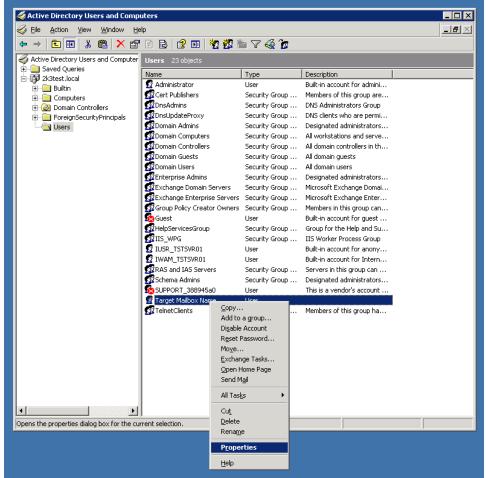

- 1. Open the Microsoft Exchange Management Shell as an administrator.
- 2. Run the following commands:

```
Add-MailboxPermission -identity MAILBOX -user USERNAME -AccessRights FullAccess -InheritanceType All
Add-ADPermission -user USERNAME -ExtendedRights Send-As MAILBOX
Add-ADPermission -user USERNAME -ExtendedRights Receive-As MAILBOX
```

substituting USERNAME and MAILBOX with your own username and the name of the user of the target mailbox.

## MS Exchange 2003

- 1. Click Start > Administrative Tools > Active Directory Users and Computers.
- 2. Under Users, right click on the user whose mailbox you wish to restore to, and click Properties.

3. In Exchange Advanced, click Mailbox Rights.

Target Mailbox Name Properties ? 🗙				
Terminal Services Profile COM+ General Address Account Profile E-mail Addresses Exchange Features	Sessions Remote control Exchange General Telephones Organization Exchange Advanced			
Simple display name:
