# Scheduled task save failed: The system cannot find the path specified

When creating or scheduling a scheduled task in Macrium Reflect you may see the following error message:

If your system is running either **ESET Smart Security** or **ESET NOD32** anti-virus you will need to add Macrium Reflect created scheduled tasks to their Exclusions list:

1. Open **ESET Smart Security** or **ESET NOD32 Antivirus** and **press F5** to open Advanced Setup.

2. Expand **Computer > Antivirus and antispyware > Exclusions**.

3. **Click 'Add'** and enter **C:\Windows\System32\Tasks\Macrium-Backup*** to allow Reflect scheduled tasks to execute without being blocked.

    Note: You must add the asterisk character after 'Macrium-Backup' to ensure that all tasks are excluded.
