

Generating an MS-DOS batch file

For an example of a generated MS-DOS batch file please see: [Example MS-DOS Batch File](#)

To generate a MS-DOS batch file select the 'XML Definition Files' tab on the main window then right click on a file and select '**Generate an MS-DOS Batch File**'.

This opens the **MS-DOS Batch Generation Options** dialog:

Batch File Output

MS-DOS Batch File Generation Options

MS-DOS

Batch File Output

Create MS-DOS Batch File

Note: For more options and flexibility generate a VBScript file. A VBScript file enables greater control and using the code generator you don't have to know a thing about the language.

Directory

C:\Users\Dev\Documents\Reflect\

File Name

FDI.bat

Backup type:

Full

OK

Cancel
