Reviewing your backup history

Macrium Reflect maintains an easy to access log of all types of backups and restores where you can review activities, purge the log files and view Windows VSS events.

1. In the main task bar click Log.

2. Clicking the Delete old logs icon will take you to the Log file purge settings, where you can select to remove old logs.

Backup Restore Log	Reflect Defaults		X
	Backup Restore Update	Schedule Scripts Retwork Email	Advanced
Gone Solution Solu		Purge log file settings Remove log files older than 52 Move to the recycle bin Perform at startup Remove Now Enable the 'Perform at startup' option to remove log files wh starts. Alternatively you may use the 'Remove Now' button to	

- 3. Make selection and click OK.
- 4. Select the activity you want to review.
