Macrium Reflect v7 Free Edition has **new features** that were not included in v6 Free Edition:

1. Instant Virtualisation of Macrium Reflect images using **viBoot**. Create a running VM of a Macrium Reflect image in seconds
2. Full support for Windows 10 Task Scheduling using the Windows Task Scheduler 2.0 API

But **Macrium Reflect Home Edition** and **Business Editions** include even more features - upgrade now for these extra features:

	<p>Macrium Image Guardian</p> <p>Image Guardian protects backup files on local drives from Ransom-ware attacks by blocking all write activity except for Macrium Reflect.</p> <p>For more information on how Macrium Image Guardian protects your backup files please see Macrium Image Guardian</p>
	<p>Changed Block Tracker</p> <p>CBT reduces the amount of time it takes to perform incremental and differential images by monitoring the changes to an NTFS formatted volume in real-time.</p> <p>Macrium Changed Block Tracker</p>
	<p>ReDeploy</p> <p>Restore your Windows operating systems to dissimilar hardware using Macrium ReDeploy to prepare Windows for the new hardware environment..</p> <p>Re-deploying Windows to new hardware using Macrium ReDeploy</p>
	<p>Incremental backups</p> <p>Create incremental backups for optimum storage utilization and backup speed.</p> <p>Differential and incremental disk images</p>

	<p>Rapid Delta Restore (RDR)</p> <p>Using advanced delta detection technology RDR can rapidly recover data from Disk Images. This cuts restore times by 90% or more.</p> <p>Rapid Delta Restore - RDR</p>
	<p>Rapid Delta Clone (RDC)</p> <p>Improving further on the cloning capabilities using technology based on RDR to speed up disk cloning activities by 90% or more.</p> <p>Rapid Delta Clone - RDC</p>
	<p>File & folder backup</p> <p>Backup collections of Files and Folders selected by file extension or name. Supports Full, Differential and Incremental backups.</p> <p>File and folder backups</p>
	<p>Scripting support</p> <p>Use backup definitions in VBScript, PowerShell or MS-DOS batch files to include them in your own workflow process.</p> <p>Generating scripts and batch files</p>
	<p>AES Encryption</p> <p>Use industry Advanced Encryption Standard to encrypt backups, choose between 128, 192 and 256 bit strength for increasing levels of encryption.</p>
	<p>Integrated email component</p> <p>Send backup completion status email notifications using the built-in email component.</p> <p>Configuring e-mail notifications</p>
